Time is the Heart of the matter...

An episode of chest pain requires highly skilled, state-of-the-art care - **immediately** - not down the road.

From fast, skilled rescue squads to our highly qualified Emergency Room staff and Board Certified Cardiology team, our community has the expertise to quickly diagnose and treat serious heart conditions in minutes.

After diagnosis, the vast majority of chest pain can be handled by our physicians, right here at Cayuga Medical Center. But if you are one of few who require further care, we will refer you to another center of excellence, that specializes in your particular condition.

In the meantime . . . the first and best response to chest pain is right in your own back yard.

A very comforting fact.
